

## Assembly Instructions for Corvus Defensio A3 Receiver Rail 35-Slots:

Seperate receiver from stock. Remove barrel.

Heat the three screws of the original Picatinny rail mount with a heat gun to release the factory thread locker.

Remove the original Picatinny Rail.

Attach the Corvus Defensio rail (preferably using the new rail mounting screws that are attached).

Note: It is recommended to apply thread locker to the screws before the final assembly since otherwise, they could loosen during use!
