

Assembly Instructions for Corvus Defensio Case Deflector

Unscrew the Corvus Defensio Case Deflector screws half way and apply thread locker to the screws:

Put the two parts of the Case Deflector together:

Place the Case Deflector in the ejection port with the wedge shaped piece at the rear:

Insert and alternately tighten the two screws until the Case Deflector sits firmly in the ejection port.

Attention! Be careful not to over-tighten the screws to avoid bending the frame or stripping the threads.
